Site Management Safety Training Scheme (SMSTS)

Introduction

The Site Managers Safety Training Scheme (SMSTS) is one of the most highly regarded health and safety training courses for the Construction, Building Maintenance and Facilities Management sectors and is achieved by 1000's of construction personnel each year.

The SMSTS course covers in depth all of the required legislation and areas which affect safe working practices whilst working in Construction Industry, Civil

Engineering and on or around building sites. The course highlights proper use of risk assessments in the workplace and the correct implementation of the necessary control measures and adequate communication to ensure a strong Health and Safety culture on a construction site.

This industry-recognised training course is also ideal for companies that need to meet the ever increasing demand for evidence of health and safety compliance.

Duration: 5 Days
Cost: £485 + VAT

Certification:
Coursework & end of course test

Site Management Safety Training Scheme (SMSTS)

Who Should Attend

This course is designed for construction site managers, agents, and project directors, plus other construction personnel who are, or are about to be, responsible for planning, organising, monitoring, controlling and administering groups of staff and workforce.

Possession of the SMSTS qualification is one of the competency requirements for site managers in the Approved Code of Practice to the Construction (Design and Management) Regulations 2007. Evidence of training is often required in tender applications and pre-qualification Health & Safety questionnaires.

AIMS

To help site managers, agents and supervisors to:

- Manage health and safety on site in accordance with current legal provisions, and within the context of their management or supervisory role
- Develop an understanding of responsibilities and accountability for site health, safety and welfare
- Recognise and maintain a safe site whilst keeping work efficient, economical and productive.

Course Content

The SMSTS training course covers the Health & Safety at Work Act and the regulations relevant to the Construction Industry (and other workplaces), including:

- Site Set Up
- Risk Assessment
- Scaffolding Awareness
- Electricity on Site
- Demolition
- Fire Prevention
- CDM Regulation
- Method Statements
- Monitoring Health & Safety
- Excavations
- Confined Spaces
- Management of Contractors

Certification

Coursework is assessed by the instructor throughout the course, via work produced by syndicate exercises and individual participation. Therefore delegates must attend all of the days, in accordance with the course programme, to achieve the necessary learning objectives to qualify for the certificate. At the end of the CITB SMSTS course, each individual also has to pass a short test and present a suitable health and safety solution to a site activity which qualifies them for the Construction Site Managers Safety Certificate.

This certificate expires every five years. After this period certificate holders are required to sit the SMSTS two day refresher course to renew their qualification for a further five years.

Duration

5 Days inclusive

Cost

Fee: £485 + VAT per delegate

Includes all refreshments, lunch, registration, examination entry fees, comprehensive course notes and certificate upon successful completion of the exams.

This course can also be run in-house for up to 20 people per course
